

Note for the record

Dated on 19th November 2015, Taipei Taiwan

件名: Re: WPA IC. REAP meetings at dinner and symposium

Dear all,

1. The scheduled timeline for REAP-AP-4 is as followed. We plan to finalize our web questionnaires before the end of December and send out the "web test version" to each participating country in January.
2. After discussing with Dr. Shinfuku, we will assign an account and a password to each hospital (NOT each country) to save sometime for account approval process.
3. We suggest to focus on "inpatient" participants, but we are open to discussion. Is there any difficulty that you might be facing to recruit inpatients up to the expected number? For expected number in each country, please see the attached file "research protocol of REAP-AP-4".
4. We plan to add two scales: BPRS and DIEPSS (Drug Induced Extrapyramidal Symptom Scale) into the data forms. This part is also open to discussion. If you prefer the shorter version, we could tailor our web survey based on each country's need.
5. As discussed in the dinner, we would like to keep the surveys as succinct as possible. The information of "number of nurses/psychologists/nurses" will be deleted. We will preserve the number of psychiatrist and bed in order to have doctor/patient ratio.
6. After talking to our IT man, he suggested us to offer at least one phone contact for each country just in case the internet or webpage does not work.

Please let us know if you have any question. I'll respond to you ASAP after thorough discussion with Taiwanese team. I'll also attach the latest country list for reference.

Dr. Shinfuku, if you think it is more appropriate to invite other national coordinators, please do so. Thank you for your keen efforts.

Best Regards,

Prepared by Mrs Lian-Yu Chen, Taipei.
